EDUCATION

SRKR Engineering Institute | 2020 – 2024

Bachelor of Technology in Information Technology | CGPA: 8.72/10

ACADEMIC PROJECTS

Automated Radiology Diagnostics Tool — Final Year Capstone | Python, PyTorch, FastAPI, Docker | GitHub

- Engineered a deep learning microservice detecting pneumonia from frontal chest X-rays with 94.6% sensitivity.
- Implemented Grad-CAM saliency heatmaps to assist radiologists in verifying model focus regions during review.
- Packaged the complete inference pipeline into containerized FastAPI REST endpoints serving predictions under 450ms.

Cloud Resource Anomaly Detector — Mini Project | Go, Prometheus, Grafana, Docker

- Constructed an asynchronous agent in Go monitoring CPU and memory exhaustion metrics across Kubernetes nodes.
- Integrated Prometheus metric scrapers with automated alerting triggers delivered via Discord webhook bots.

TECHNICAL SKILLS

Languages: Python, Go, SQL, C++
Frameworks: PyTorch, FastAPI, Flask, Docker
Database: PostgreSQL, MongoDB, Redis

CERTIFICATIONS

Deep Learning Specialization – DeepLearning.AI
Foundational Go Programming – Coursera

LANGUAGES

English, Telugu, Hindi
